

Submission Worksheet

Submission Data

Course: IT202-010-S2026

Assignment: IT202 - Milestone 3

Student: Pratik P. (pbp5)

Status: Submitted | **Worksheet Progress:** 100%

Potential Grade: 10.00/10.00 (100.00%)

Received Grade: 0.00/10.00 (0.00%)

Started: 5/7/2026 3:39:50 PM

Updated: 5/7/2026 5:24:44 PM

Grading Link: <https://learn.ethereallab.app/assignment/v3/IT202-010-S2026/it202-milestone-3/grading/pbp5>

View Link: <https://learn.ethereallab.app/assignment/v3/IT202-010-S2026/it202-milestone-3/view/pbp5>

Instructions

1. Refer to Milestone3 of this doc:
<https://docs.google.com/document/d/1XE96a8DQ52Vp49XACBDTNCq0xYDt3kF29cO88EWWwfo/view>
2. Ensure you read all instructions and objectives before starting.
3. Ensure you've gone through each lesson related to this Milestone
4. Switch to the Milestone3 branch
 1. `git checkout Milestone3` (ensure proper starting branch)
 2. `git pull origin Milestone3` (ensure history is up to date)
5. Fill out the worksheet below
 - Ensure there's a comment with your UCID, date, and brief summary of the snippet in each screenshot
 - Ensure proper styling is applied to each page
 - Ensure there are no visible technical errors; only user-friendly messages are allowed
6. Once finished, click "Submit and Export"
7. Locally add the generated PDF to a folder of your choosing inside your repository folder and move it to GitHub
 1. `git add .`
 2. `git commit -m "adding PDF"`
 3. `git push origin Milestone3`
 4. On GitHub merge the pull request from Milestone3 to qa
 5. On GitHub create a pull request from qa to prod and immediately merge. (This will trigger the prod deploy to make the Render.com prod links work)
8. Upload the same PDF to Canvas
9. Sync Local
10. `git checkout qa`
11. `git pull origin qa`

Section #1: (3 pts.) Api Data

Progress: 100%

⇒ Task #1 (1 pt.) - Concept of Data Association

Details:

- What is the concept of your data association to users? (examples: favorites, wish list, purchases, assignment, etc)
- Describe with a few sentences

Your Response:

The data association that I will be using is a favorites list. Users will be able to add their favorite city or favorite country to a list of their favorites. They will also be able to filter through their favorites list, either by name, population for cities, or country code for countries.

Saved: 5/7/2026 3:41:56 PM

⇒ Task #2 (1 pt.) - Data Updates

Details:

- When an associated entity is updated (manually or via API), how is the association affected?
 - Does the user see the old version of the data?
 - Does the user see the new version of the data?
 - Does the user need to have data re-associated or remapped?
- Explain why.

Your Response:

When an association entity is updated, the user will see the updated entity when looking at their favorite city or country. This is because the relationship is stored, not the data of the city or country. When referring to a city or country, it will refer to the most updated version and prevents older versions of entities appearing in the favorites list.

Saved: 5/7/2026 3:44:07 PM

≡ Task #3 (1 pt.) - Handling Association

🖼 Part 1:

Details:

- Show an example page of where a user can get data associated with them
- Ensure the Render.com qa URL is visible
- Caption if this is a user-facing page or admin page
- Include screenshots of code related to this logic including the database query

favorites option in city list, user facing

city success, user facing

can toggle favorite from view city, user facing

favorites option in country list, user facing

country success, user facing

can toggle favorite from view country, user facing

helper func

toggle country

 Saved: 5/7/2026 4:07:15 PM

Part 2:

Progress: 100%

Details:

- Include the pull request link for this feature
- Include the Render.com prod link to this page that triggers and handles this logic

URL #1

<https://github.com/pbp965/pbp5-IT202-01050>

URL

 Saved: 5/7/2026 4:07:15 PM

Part 3:

Progress: 100%

Details:

- Describe the process of associating data with the user.
- Can it be toggled, or is it applied once?

Your Response:

Adding favorites is toggleable, when pressing toggle favorite, a helper function of the same name adds the instance of the city/country to the favorites db. If changes are made to the cities/countries, the changes will be seen in the entities in the favorites db as well.

 Saved: 5/7/2026 4:07:15 PM

Section #2: (6 pts.) Associations

Progress: 100%

Details:

- Each line item should have a logical summary
- Each line item should have a link/button to a single view page of the entity
- Each line item should have a link/button to a delete action of the relationship (doesn't delete the entity or user, just the relationship)
- The page should have a link/button to remove all associations for the particular user
- The page should have a section for stats (number of results and total number possible based on the query filters)
- The page should have logical options for filtering/sorting
 - A limit should be applied between 1 and 100 and controlled by the user (server-side enforces rules)
 - A filter with no matching records should show "no results available" or equivalent

Part 1:

Details:

- Show a few examples of this page from Render.com qa with various filters applied
- Ensure the Render.com qa URL is visible
- Ensure each requirement is visible
- Include the code screenshots related to this page

Task #2 (1.50 pts.) - All Users Association Page

Progress: 100%

Details:

- Each line item should have a logical summary
- Each line item should include the username this entity is associated with
 - Clicking the username should redirect to that user's public profile
- Each line item should include a column that shows the total number of users the entity is associated with
- Each line item should have a link/button to a single view page of the entity
- Each line item should have a link/button to a delete action of the relationship (doesn't delete the entity or user, just the relationship)
- The page should have a section for stats (number of results and total number possible based on the query filters)
- The page should have logical options for filtering/sorting
 - Include a filter for partial username match to show only matching users' associated entities
 - A limit should be applied between 1 and 100 and controlled by the user (server-side enforces rules)
 - A filter with no matching records should show "no results available" or equivalent
- When a filter is applied, the page should have a link/button to remove all associations for the matching user(s)

Part 1:

Progress: 100%

Details:

- Show a few examples of this page from Render.com qa with various filters applied
- Ensure the Render.com qa URL is visible
- Ensure each requirement is visible
- Include screenshots of code related to this logic including the database query

```

Your Response:

Unassociated cities and countries are gathered using a query where a city or country is not associated with a user (ie not favorited) and is outputed.

Saved: 5/7/2026 5:05:53 PM

≡ Task #4 (1.50 pts.) - Admin Association Page (Like User Roles)

Progress: 100%

Details:

- The page should have a form with two fields
 - Partial match for username
 - Partial match for entity reference (name or something user-friendly)
- Submitting the form should give up to 25 matches of each
 - Likely best to show as two separate columns
- Each entity and user will have a checkbox next to them
- Submitting the checked associations should apply the association if it doesn't exist; otherwise it should remove the association
 - A filter with no matching records should show "no results available" or equivalent

📁 Part 1:

Progress: 100%

Details:

- Show a few examples of this page from Render.com qa with various selections having been submitted
- Ensure the Render.com qa URL is visible
- Ensure each requirement is visible
- Include screenshots of code related to this logic including the database query

Task #2 (0.33 pts.) - WakaTime - Activity

Progress: 100%

Details:

- Visit the WakaTime.com Dashboard
- Click **Projects** and find your repository
- Capture the overall time at the top that includes the repository name
- Capture the individual time at the bottom that includes the file time
- Note: The duration isn't relevant for the grade and the visual graphs aren't necessary

Projects • **pbp5-IT202-010**

Briefly answer the question (at least a few decent sentences)

Your Response:

Creating the table for favorites in cities and countries.

Saved: 5/7/2026 5:24:06 PM

⇒ Task #3 (0.33 pts.) - What was the hardest part of the assignment?

Progress: 100%

Details:

Briefly answer the question (at least a few decent sentences)

Your Response:

The hardest part of this assignment was trying assign associations to users as an admin.

Saved: 5/7/2026 5:24:44 PM
